

A NEW GENERATION OF KERATIN SMOOTHING TREATMENT with more body and movement

Cysteine Smoothing Treatment

An amazing ALL NATURAL Smoothing Treatment for reducing FRIZZ & CURL

**** NEW LOWER PRICES!!!! starting at \$200!!**

1. Is Cysteine Complex a Keratin Treatment or a Relaxer?

Cysteine Complex is a non-formaldehyde Keratin Treatment that reduces 70% curl volume on Caucasian hair and 50-60% curl volume on ethnic hair.

2. Can the Cysteine Complex be placed over relaxers?

Yes, the Cysteine can be applied over any relaxer. When applying Cysteine Complex over any

other Keratin Treatment make sure that it has been at least 2 months from the application of previous treatment.

3. Should Cysteine Complex be applied before or after a color service?

We recommend that Cysteine Complex be done after a color service. Because color opens the hair's cuticle.

4. How long will Cysteine Complex last in the hair?

Aftercare and maintenance is essential to the life of the treatment. Recommending Anti-Frizz Keratin Shampoo and Conditioner will help extend the life of Cysteine Complex and protect their investment. Cysteine Complex lasts an average of 2-3 months.

5 . Can I swim in the pool or in the ocean?

Make sure you set your hair before and wash your hair after.

6. Why should I use sulfate free shampoos and conditioners?

Because sulfate will strip the Keratin out from the hair.

7. Why should I use the Cysteine Complex over any other Chemical treatment?

Cysteine Complex is a natural, effective, chemical free way of naturally restoring and transforming chemically treated hair to a manageable, luxurious finish. Cysteine Complex conditions, restores and transforms bringing vitality and shine to natural and chemically treated hair. Stop the Chemical addiction and try the natural alternative, for a better earth and a greener YOU!
